

Front-end | Vue + Axios + Bored API

General Structure:

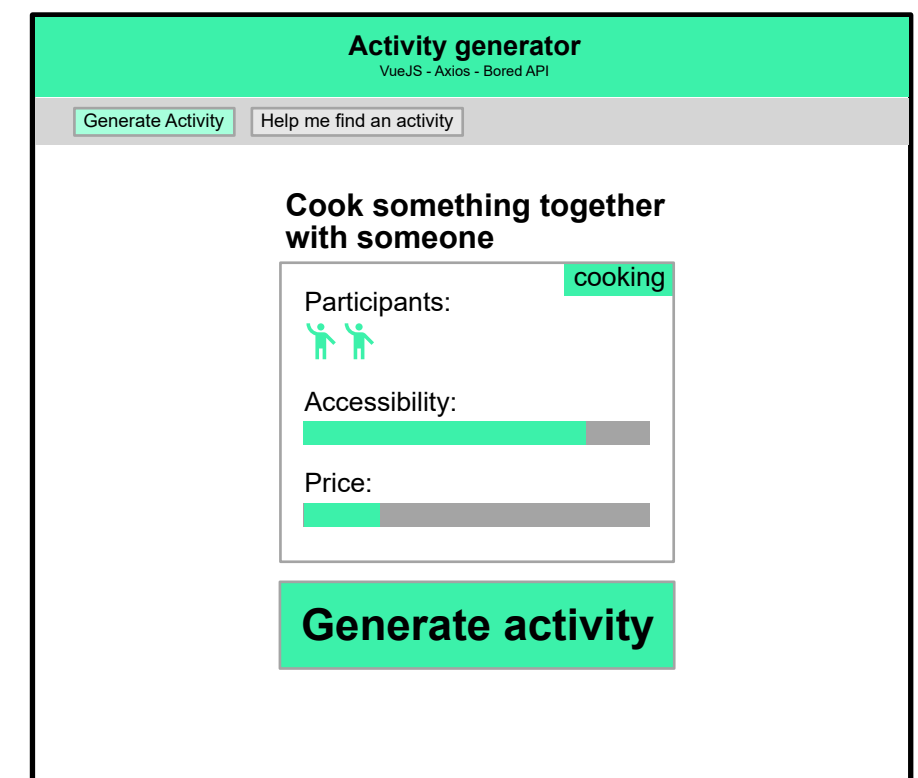

- 1 Top menu bar that stays on every "page".
- 1 Main content container that switches according to "page".

Main Menu Structure:

- Buttons that activate the "page" components to show.
- Show ACTIVE page with highlight color.

Filter component Structure:

- Form with different inputs that give filter parameters to Bored API.
- No required inputs. If nothing is chosen, the filter will not be taken into account.
- if no minimum price is selected, 0 will be the standard value.
- if no maximum price is selected, Maximum will be set equal to minimum.
- Bored API has no results for more than 5 participants, so I left them out. But you could easily add more when Bored API adds activities for 5+ people.

Filter component Structure:

- Results from api will be shown in a usefull way
- these results are not interactive.
- optional animations to add dynamic movements.
